THE JOURNAL
OF THE
ROYAL AERONAUTICAL SOCIETY
with which is incorporated The Institution of Aeronautical Engineers

INDEX TO VOL. XLVIII.

AERODYNAMICS

The Influence of Reynolds Number at High Mach Numbers, A. Ferri (*Atti di Guidonia*, No. 67-69; *Luftwissen*, March, 1943), p. 45.

AERONAUTICAL SOCIETY, ROYAL

Abstracts, Notice re, p. 268.
Acknowledgments, pp. 2, 53, 73, 208, 335, 485.
Advertisements (Notice re), p. 98.
Aerial Science, Ltd., Balance Sheet, p. 84.
Aeronautical Trusts, Ltd., Balance Sheet, p. 84.
Aeronautical Trusts, Ltd., Income and Expenditure Account, p. 88.
Annual Council Dinner, p. 460.
Annual General Meeting, p. 78.
Annual Report of the Council (79th), p. 75.
Annual Subscriptions, pp. 2, 27, 513.
Associate Fellowship Examination—December, 1943. Results, p. 54; Council Remarks, p. 82. May, 1944. Date, pp. 54, 73; Results, p. 267. December, 1944. Date, pp. 163, 268, 335.
Baden-Powell Memorial Prize (Award, Dec., 1943), pp. 54, 80. Award (May, 1944), p. 267.
Birmingham Branch (suggestion), p. 164.
Birthday Honours, p. 207.
Branch Lectures, pp. 26, 52, 72, 95, 335, 392, 483, 512.
Branch Prize, p. 82.
Branches (List), p. 80.
Branches (New), p. 53.
Civil Aviation Discussion, p. 391.
Correspondence, pp. 92, 159, 202, 264, 300, 482.
Council (1944), pp. 71, 75.
Council Election, pp. 2, 26.
Donations, p. 77.
Duplicate Magazines, Appeal for, p. 28.
Durand's "Aerodynamic Theory" (Reprints), p. 207.
Education and Training of Aeronautical Engineers (Discussion), p. 80.
Election of Members (1943), p. 83. Election of Members (1944), pp. 3, 27, 53, 72, 95, 164, 208, 268, 335, 393, 484, 513.
Elliott Memorial Prize (Award, 1943), p. 80. (Award, 1944), p. 268.
Fellows (elected, 1944), p. 72.
Finance, p. 83.
Glasgow Branch (suggestion), p. 268.
Graduates' and Students' Section. Annual General Meeting, p. 52. Lectures, pp. 1, 25, 52, 72, 95, 207, 267, 335, 393. Visits to Works, pp. 26, 52, 393.
Honorary Fellowship (Dr. E. P. Warner), p. 83.
Honours, p. 80.
Income Tax, pp. 54, 97, 163.
Industrial Management, Lectures on, p. 96.
Journal (accounts), pp. 83, 90.
Journal, Appeal for Copies, pp. 207, 268, 335.
Journal, Binding, pp. 2, 28.
Journal, Increase in Price, pp. 391, 483, 511.
Lecture Speakers (Aerodynamic Features of German Aircraft). Mr. N. E. Rowe, p. 329; Mr. T. P. Wright, p. 330; Mr. R. T. Youngman, p. 330.
Lecture Speakers (Design and Production of Airframes). Mr. A. Gouge (President), pp. 252, 258; Sir F. Handley Page, p. 252; Mr. N. E. Rowe, p. 252; Mr. Westbrook, p. 253; Mr. Hollis-Williams, p. 253; Dr. Kelley, pp. 253, 254; Mr. Egerton-Banks, p. 254; Air Vice-Marshal Jones, p. 255; Mr. Fearn, p. 255; Mr. Manson, p. 255; Mr. Serby, p. 255; Mr. M. Langley, p. 256; Mr. Cuss, p. 257; Mr. Vokes, p. 257; Mr. Woodford, p. 258; Mr. Bound, p. 258; Mr. Beaumont, p. 258.
Lecture Speakers (Flight Testing Methods). G./Capt. Bulman, p. 150; R. K. Pierson, p. 151; G./Capt. McKenna, p. 152; Sir F. Handley Page, p. 152; F./Lt. C. F. Uwins, p. 153; Mr. N. E. Rowe, p. 154; Mr. C. C. A. Woodford, p. 154; Mr. C. P. T. Lipscomb, p. 155; F./Lt. P. G. Lucas, p. 155; Mr. A. Gouge (President), p. 156; Mr. S. Scott-Hall, p. 156.
Lecture Speakers (Structural Features of German Aircraft). Dr. A. G. Pugsley, p. 195; Mr. N. Nicholas, p. 195; Mr. Davison, pp. 195-199; Mr. W. Tye, p. 196; Dr. Williams, p. 196; Dr. Leggett, pp. 197-

200; Mr. E. Pribram, p. 198; Mr. T. H. Turner, p. 198; Mr. W. E. Park, pp. 199-200; Mr. T. Haas, p. 200; Mr. B. W. G. Foster, p. 201.
Lecture Speakers (Wilbur Wright Lecture (Aircraft Power Plant)). Mr. A. Gouge (President), p. 337; Sir O. Simmonds, p. 459; Air Com. F. R. Banks, p. 459.
Lectures (Announcements), pp. 1, 25, 51, 483, 511.
Library Additions, pp. 4, 29, 55, 73, 96, 165, 209, 269, 335, 394, 485, 514.
Luton Branch, p. 208.
Medals (Acquisition of Collection), p. 83.
Medals and Awards, p. 79.
Membership (1943), p. 77.
Message from Secretary (Correspondence delays), p. 51.
Monthly Notices, pp. 1, 25, 51, 71, 95, 163, 207, 267, 335, 391, 483, 511. Monthly Notices (surcharge on), p. 27.
New Year Honours, p. 25.
Obituaries, p. 91.
Officers and Committees, p. 90.
President, 1943-44, pp. 71, 79. President, 1944-45, p. 163.
S.B.A.C. Scholarships, pp. 25, 80.
Special General Meeting, p. 1.
Staff, p. 90.
Vice-Presidents, 1943-44, pp. 71, 79. Vice-Presidents, 1944-45, p. 163.
Wilbur Wright Memorial Lecture, 1943, p. 80. Wilbur Wright Memorial Lecture (date), p. 71. Wilbur Wright Memorial Lecture, 1944 (32nd), pp. 337, 397. 487.

AEROPLANES: CONSTRUCTION AND DESIGN
Aerodynamic Features of German Aircraft, M. B. Morgan and R. Smelt, p. 271.
Aspects of the Design and Production of Airframes with particular reference to their Co-ordination and to the Reduction of the Development Period, p. 210.
Structural Features of German Aircraft, D. M. A. Leggett and J. H. H. Davison, p. 167. Correspondence, pp. 265, 482.

AEROPLANES: PERFORMANCE (FULL-SCALE TESTS)
Flight Testing Methods, E. T. Jones, p. 99. Correction, p. 165. Correspondence, p. 264.

AEROPLANES—STRENGTH OF
Factors of Safety—or of Habit? W. Tye, p. 487.

AIRSCREWS: STRENGTH
The Stressing of Deflected Propeller Blades, C. F. Hodson, p. 462.

BAIRSTOW, PROF. L.
Retirement from Zaharoff Chair, p. 391.

BINNIE, A. M. and J. C. WARD
Stresses due to Internal Hydrostatic Pressure in Thin-Walled Vessels of Streamline Form, p. 538.

BREWER, GRIFFITH
Correspondence (The Wright Trilogy), p. 92.

BRISTOL UNIVERSITY
Chair of Civil Engineering, p. 391.

DAVISON, J. H. H. and D. M. A. LEGGETT
Structural Features of German Aircraft, p. 167. Correspondence, pp. 265, 482.

DURAND
"Aerodynamic Theory" (Reprint), p. 207.

ELECTRICITY
Cooling and Governing Problems on a Water-Cooled Auxiliary Generating Plant, R. B. Winn, p. 516.

ENGINES
Aircraft Power Plant—Past and Future, Sir A. H. Roy Fedden (32nd Wilbur Wright Memorial Lecture), pp. 337, 397. Correction, p. 391.

ENGINES, SUPERCHARGING
The Design and Operation of Superchargers, A. J. Penn, p. 495.

FEDDEN, SIR A. H. ROY
Aircraft Power Plant—Past and Future (32nd Wilbur Wright Memorial Lecture), pp. 337, 397. Correction, p. 391.

FERRI, A.
The Influence of Reynolds Number at High Mach Numbers (*Atti di Guidonia*, No. 67-69; *Luftwissen*, March, 1943), p. 45.

GREENWOOD, S. W.
Correspondence, p. 390.

HALL, MR. A. A.
Appointment to Zaharoff Chair, p. 391. Correction, p. 484.

HODSON, C. F.
The Stressing of Deflected Propeller Blades, p. 462.

HYDROSTATICS
Stresses due to Internal Hydrostatic Pressure in Thin-Walled Vessels of Streamline Form, A. M. Binnie and J. C. Ward, p. 538.

INDUSTRIAL MANAGEMENT
University of London Lectures, p. 96.

INSTRUMENTS
Comparison of Various Methods for determining Flight Speed at Great Altitudes, R. Schmidt (Trans. by L. J. Goodlet from *Luftwissen*, Sept., 1942), p. 12. Correspondence, p. 159.

JONES, E. T.
Flight Testing Methods, p. 99. Correction, p. 165. Correspondence, p. 264.

KOENIG, M.
Stress Concentration in Cold-Riveted Joints under Load (*Schweizer Archiv*, Feb., 1937. Trans. by L. J. Goodlet), p. 31.

KRZYWOBLOCKI, Z. L.
Rocket-Wing-Bomb and Rocket Torpedo, p. 58. Correspondence, pp. 202, 390.

LEGGETT, D. M. A. and J. H. H. DAVISON
Structural Features of German Aircraft, p. 167. Correspondence, pp. 265, 482

MANLEY, R. G.
Torsional Vibration Analysis of Systems connected by Flexibly-Mounted Epicyclic Gearing (An Extension of the Dynamic Stiffness Method), p. 260.

MATERIALS: RIVETING
Stress Concentration in Cold-Riveted Joints under Load (M. Koenig, *Schweizer Archiv*, Feb., 1937. Trans. by L. J. Goodlet), p. 31.

MATERIALS: THEORY OF STRUCTURES
Approximate Solution for Tapered Pin-Ended Struts, H. Templeton, p. 6. Correction, p. 29.

MENSFORTH, ERIC and W. E. W. PETTER
Aspects of the Design and Production of Airframes with particular reference to their Co-ordination and to the Reduction of the Development Period, p. 210.

MORGAN, M. B. and R. SMELT
Aerodynamic Features of German Aircraft, p. 271.

PAWLOWSKI, PROF. F. W.
Correspondence, p. 482.

PENN, A. J.
The Design and Operation of Superchargers, p. 495.

PETTER, W. E. W. and ERIC MENSFORTH
Aspects of the Design and Production of Airframes with particular reference to their Co-ordination and to the Reduction of the Development Period, p. 210.

PUGSLEY, DR. A. G.
Appointment to Bristol University, p. 391.

REVIEWS
Aerodynamics of the Aeroplane, W. L. Cowley, p. 70.
Aeroplane Flight, H. F. Browne, p. 481.
The Air Mariner (2nd Ed.), D. C. T. Bennett, p. 24.
Aircraft Mechanic's Pocket Book, John T. Henshaw, p. 334.
Aircrew Exercises for the Air Training Corps. Air League of the British Empire, p. 24.
America Fledges Wings, R. M. Cleveland, p. 49.
American War Planes in Action, S. E. Veale, p. 69.
The Analysis of Engineering Structures (2nd Ed.), A. J. S. Pippard and J. F. Baker, p. 68.
Basic Radio, C. L. Boltz, p. 206.
A Bibliography of Aviation Medicine, E. C. Hoff and J. F. Fulton, p. 50. Correction, p. 208.
The Birth of the Royal Air Force, Air Com. J. A. Chamier, p. 205.
British Aircraft (Vol. 1), R. A. Saville-Sneath, p. 332.
Calculations from Drawings, F. Holliday, p. 481.
The Chemical Background for Engine Research, Ed. by R. E. Burk and O. Grummit, p. 206.
The Chichester Sun Compass, F. Chichester, p. 510.
Civil Aviation, Michael Young, p. 94.
Engineering Materials Annual, Ed. by H. H. Jackson, p. 332.
Engineering Production Annual, Ed. by H. H. Jackson, p. 332.
The Flight Testing of Production Aircraft, J. A. Crosby Warren, p. 94.
Fogs, Clouds and Aviation, W. J. Humphreys, p. 332.
Gas Turbines and Jet Propulsion for Aircraft (3rd Ed.), G. Geoffrey Smith, p. 333.
Handbook for M.A.P. and M.O.S. Contractors, S. J. Noel-Brown, p. 510.
How our Army grew Wings, C. de F. Chandler and F. P. Lahm, p. 202.
An Introduction to the Principles of Flight, W. F. Ware, p. 24.
Introductory Magnetism and Electricity, T. M. Yarwood, p. 162.
Map Reading and Aviation, R. M. Field and H. T. Stetson, p. 49.
The Men Who Fly, Hector Hawton, p. 69.
A Metallurgical Study of German and Italian Aircraft Engine and Airframe Parts. Aero-Components Sub-Committee, p. 204.
The Observer's Book of Airplanes, J. Lawrence, p. 24.
Paratroops, F. O. Miksche, p. 204.

Physiology in Aviation, C. L. Gemmill, p. 203. Correction, p. 208.
The Recognition of Operational Aircraft, Capt. G. B. Ransford, p. 162.
Teach Yourself Astro-Navigation, "Kaspar," p. 69.
Teach Yourself Meteorology, "Aeolus," p. 162.
The Testing of Aero Engines, R. A. Beaumont, p. 205.
Triumph over Tunisia, Wing Com. T. H. Wisdom, p. 68.
Youth at War, Published by B. T. Batsford, p. 333.

ROCKET PROPULSION
Rocket-Wing-Bomb and Rocket Torpedo, Z. L. Krzywoblocki, p. 58. Correspondence, pp. 202, 390.

ROYAL AIR FORCES ASSOCIATION
Appeal for Funds, p. 484.

SCHMIDT, R.
Comparison of Various Methods for determining Flight Speed at Great Altitudes (Trans. by L. J. Goodlet from *Luftwissen*, Sept., 1942), p. 12. Correspondence, p. 159.

SHORT, OSWALD
Correspondence, p. 264.

SMELT, R. and M. B. MORGAN
Aerodynamic Features of German Aircraft, p. 271.

SOCIETY OF BRITISH AIRCRAFT CONSTRUCTORS
Scholarships, p. 25.

TEMPLETON, HAYDN
Approximate Solution for Tapered Pin-Ended Struts, p. 6. Correction, p. 29.

TYE, W.
Factors of Safety—or of Habit, p. 487.

UNIVERSITY OF LONDON
Lectures on Industrial Management, p. 96.

VIBRATION
Torsional Vibration Analysis of Systems connected by Flexibly-Mounted Epicyclic Gearing (An Extension of the Dynamic Stiffness Method), R. G. Manley, p. 260.

WARD, J. C. and A. M. BINNIE
Stresses due to Internal Hydrostatic Pressure in Thin-Walled Vessels of Streamline Form, p. 538.

WARNER, DR. E. P.
Election as Hon.F.R.Ae.S., p. 83.

WEYL, A. R.
Correspondence, pp. 265, 482.

WILBUR WRIGHT MEMORIAL LECTURE (32nd)
Aircraft Power Plant—Past and Future, Sir A. H. Roy Fedden, pp. 337, 397.

WINN, R. B.
Cooling and Governing Problems on a Water-Cooled Auxiliary Generating Plant, p. 516.

WRIGHT, ORVILLE
Message for Wilbur Wright Lecture, p. 337.

WRIGHT, WILBUR and ORVILLE
Biography by Fred Kelly (Mr. Griffith Brewer's comments), p. 92.

ZAHAROFF CHAIR OF AVIATION
p. 391. Correction, p. 484.

INDEX

OF

Abstracts from the Scientific and Technical Press

Nos. 118 to 126 (1943-1944)

NOTE.—*Page numbers do* NOT *refer to the Journal but to the paging of the Abstracts.*

ACCIDENTS, *see* also Engines

American Statistics of Civil Aircraft Accidents due to Engine Failure (Engines of 90 h.p. or less) (*Inter. Avia.*, Nos. 898-899, 11/12/43), p. 220.

Training Accidents in the U.S.A. (*Inter. Avia.*, No. 906, 12/2/44), p. 386.

ACOUSTICS

The Superposition of Undamped Two-Dimensional Pressure Waves of Large Amplitude (Pfriem, *Akustische Zeitschrift*, March, 1942), p. 306.

AERODROMES—DESIGN

The Consolidation of Large Surface Areas with Cement (*Z.V.D.I.*, Vol. 88, Nos. 7-8, 19/2/44), p. 383.

AERODYNAMICS—DRAG, *see* Aeroplanes—Wings

AERODYNAMICS—SUPERSONIC

Some Considerations on the Diminution of Resistance at Supersonic Speed by the Chilowsky Process (Riabouchinsky, *Comptes Rendus*, Vol. 208, No. 26, 26/6/39), p. 9.

Striation Technique applied to the Supersonic Wind Tunnel (De Haller, *Mitt. E.T.H., Zürich*, No. 8, 1943), p. 313.

AERODYNAMICS—TURBULENCE, *see* also Heat Transmission

Experimental Layout for Recording Speed Variation in Turbulent Flow (Datwyler, *Mitt. E.T.H., Zürich*, No. 8, 1943), p. 311.

AEROFOILS—MODEL EXPERIMENTS, *see* also Airscrews—Testing

The Aerodynamics of Model Aircraft in Free Flight (F. W. Schmitz, 1942. Publishers, Volckmann, Berlin), p. 148.

AEROPLANES—FLUTTER, *see* also Vibration

Three-Dimensional Wing Flutter Analysis (Flax, *J. Aeron. Sci.*, Feb., 1943), p. 79.

AEROPLANES—PARTICULAR TYPES

The Single-Seat Slow Speed Aircraft L.F.1 built by the Brunswick Technical High School (Winter, *Z.V.D.I.*, Vol. 88, Nos. 3-4, 21/1/44), p. 231.

AEROPLANES: PEFORMANCE—CLIMB

Rate of Climb Calculations (Otten, *J. Aeron. Sci.*, Feb., 1943), p. 73.

AEROPLANES: PERFORMANCE—TAKE-OFF AND LANDING

The Effect of Propeller Thrust on the Take-off Distance (Roth, *Flugwehr und Technik*, Jan., 1944), p. 386.

Landing Runs of Aircraft with or without Brakes in the presence of a Headwind (Winter and Meyer, *L.F.F.*, 28/2/44), p. 599.

AEROPLANES—PRODUCTION

Infinitely Variable Gears for Machine Tools (Schopke, *Z.V.D.I.*, Vol. 87, Nos. 49-50, 11/12/43), p. 225.

AEROPLANES—UNDERCARRIAGES

Caterpillar Track Landing Gear (*Inter. Avia.*, Nos. 891-892, 30/10/43), p. 72.

AEROPLANES—WINGS

The Effect of Rounding-off an originally Sharp Leading Edge on the Resistance of Wings (Wolff, *Ing. Arch.*, Dec., 1933), p. 460.

Induced Drag of a Twisted Wing (Sibert, *J. Aeron. Sci.*, Feb., 1943), p. 84.

AIRSCREWS, *see* also Aeroplanes, Performance—Take-off and Landing; De-Icing

The Aeromatic Propeller (Fedan, *Aero Digest*, 1/5/44), p. 670.

AIRSCREWS—TESTING

A Photographic Profile Recorder for Airscrews and Model Aerofoils (Kuhl and Raab, *Luftwissen*, May, 1938), p. 308.

AIRSCREWS—THEORY

Dynamics of Constant Speed Propellers (Weiss, *J. Aeron. Sci.*, Feb., 1943), p. 80.

Theoretical Examination of Axial Fan Performance (Struve, *C.A.H.I.*, No. 295, 1937; R.T.P. Trans. No. T.M.1042), p. 12.

BALLOONS, *see* also Bombs and Ballistics

The Permeability of Balloon Fabrics towards Hydrogen (Van Nonhuys, *Melliand Textilberichte*, Dec., 1943), p. 229.

BOMBS AND BALLISTICS, *see* also Wind Tunnels

Device for Cutting Barrage Balloon Cables (*Inter. Avia.*, Nos. 891-892, 30/10/43), p. 72.

Testing Armour-Piercing Bullets for Cracks after Manufacture (*Z.V.D.I.*, Vol. 88, Nos. 3-4, 22/1/44), p. 227.

The Upper Limit of Projectile Velocity (Pfriem, *Z.f. Techn. Physik*, Vol. 22, No. 10, 1941), p. 380.

BOMBS AND BALLISTICS: BOMBS

American Bomb Types (*Inter. Avia.*, Nos. 898-899, 11/12/23), p. 218.

CHEMISTRY

Method of Increasing the Low Temperature Stability of Cellulose Acetate Films (Rogovin and Ivanova, *J. Appl. Chem. U.S.S.R.*, Vol. 14, No. 6, 1941; R.T.P. Trans. No. 2121), p. 309.

CIVIL AVIATION, *see* also Accidents

American Commercial Aircraft Type Programmes (*Inter. Avia.*, Nos. 927-928, 28/6/44), p. 671.

Feeder Air Services (Ausstutz, *Inter. Avia.*, Nos. 920-21, 20/5/44), p. 598.

Flight Schedules and Fares for Pan-American Airways World Service in 1948 (*Inter. Avia.*, Nos. 927-928, 28/6/44), p. 672.

Fundamental Problems of the Development of Air Transportation (Pirath, *Inter. Avia.*, Nos. 918-19, 11/5/44), p. 598.

CONTROL OF AEROPLANES AT LOW SPEEDS

Development of Stall Warning Indicators (George, 12th Annual Meeting, *Inst. Aeron. Sciences*, Jan., 1944; Reprint), p. 314.

DE-ICING, *see* also Meteorology

New De-Icing Developments (*Inter. Avia.*, Nos. 898-899, 11/12/43), p. 219.

EDUCATION

A Technologist looks at the Future (Burch, *Nature*, 6/11/43), p. 8.

ELECTRICITY AND MAGNETISM, *see* also Materials—Nickel; Materials—Non-Ferrous; Materials — Testing; Wireless — Disturbances and Faults

The Amplidyne (Felix, *J. Amer. Soc. of Naval Engineers*, Nov., 1943), p. 156.

The Bolometer Amplifier (Merz, *A.T.M.*, 264-2, T.27, Feb., 1937), p. 464.

Device for Stripping Insulation from Electric Conductors (D.R.G.M., 1, 504, 595) (*Der Flieger*, July, 1943), p. 315.

Electric Power for Aircraft (Clardy, *Electrical Engineering*, July, 1940, U.S.A.), p. 465.

Electrical Systems of Large Aircraft (Brice and Levoy, *Aero Digest*, 15/4/44), p. 678.

The Influence of Atmospheric Conditions on the Insulation Strength of High Voltage Systems, with Particular Reference to High Altitudes (Jacottet, *Archiv f. Elektrotechnik*, Vol. 36 (1942), No. 11, pp. 629-651), p. 679.

Photoelectric D.C. Amplifiers (Merz, *A.T.M.*, Z.64-3, T.167, Dec., 1937), p. 465.

Some Physical Aspects of Ionospheric and Geomagnetic Disturbances and Allied Astrophysical Problems (Gnevyshev, *Bull. Acad. Sci.*, U.S.S.R. Phys. Ser., Vol. 7, No. 4, 1943, pp. 134-144), p. 466.

The Theory of Auto-Compensating D.C. Amplifiers utilising direct Mechanical Control (Merz, *Archiv f. Elektrotechnik*, Vol. 31 (1937), No. 1, pp. 1-23), p. 607.

ENGINES, *see* also Accidents

A Statistical Survey of Failures in Aircraft Engines (Rolle, *Aero Digest*, 15/4/44), p. 673.

ENGINES—COOLING

Fan-Cooled Engines (*Inter. Avia.*, No. 926, 22/6/44), p. 673.

Intercooler Problems in Aeroplane Design (Dickinson, *Aviation*, May, 1944), p. 673.

ENGINES—IGNITION

A.B.A. Pressure Priming System for Starting Aircraft (*Inter. Avia.*, Nos. 898-899, 11/12/43), p. 220.

ENGINES—LUBRICATION

Aircraft Oil Systems—High Altitude Problems (Moermann, *S.A.E. Journal*, Nov., 1943; Transactions, pp. 394-396, 407), p. 7.

ENGINES — SUPERCHARGERS, *see* also Instruments— Testing

Electronic Turbo Supercharger Control System (Gilles and Sparrow, *Aero Digest*, 15/3/44), p. 467.

ENGINES—TURBINES

The Energy Transformation in the Gas and Oil Turbine (Nusselt, *Die Warme*, June, 1943), p. 157.

On the Question of using Unshrouded Blades in Gas Turbines (Shevyakov, *Sovietskoye Kotloturbostroynie*, Jan., 1940, U.S.S.R.), p. 307.

Some Simplified Formulæ applied to the Gas Turbine (Roy, *Compt. Rend.*, Vol. 214, No. 7, 16/2/42), p. 596.

FANS, *see* Airscrews—Theory

FLUID MOTION

The Break-up of a Liquid Jet by the Action of a Parallel Airstream (Siestrunk, *Comp. Rend.*, Vol. 215, No. 18, 3/11/42), p. 668.

FLUID MOTION—THEORY

The Formation of Drops at Nozzles and the Disintegration of Fluid Jets (Ohnesorge, *Z.V.D.I.*, 17/4/37), p. 78.

FUELS

Device for Damping Exhaust Flames (Patent Digest) (German Patent No. 714,878, Dornier, 5/2/42), p. 673.

Vapor Pressure of Petrols and Kerosenes (Tech. Data on Fuel, World's Power Conference, London, 1928, pp. 151 and 156-57), p. 390.

FUELS—INDICATORS, PUMPS, ETC.

Electric Flow Meter of the Sampling Type (*Z.V.D.I.*, Vol. 87, Nos. 35-36, 4/9/43), p. 390.

FUELS—TANKS, *see* Materials—Plastics

GASES, *see* also Balloons

The Propagation of Two-Dimensional Disturbance in Gases in the Absence of Friction (Bechert, *Ann. d. Phys.*, Vol. 37 (1940), pp. 89-123, and Vol. 38 (1940), pp. 1-25), p. 591.

The Theory of Two-Dimensional Gas Waves of Large Amplitude (Pfriem, *Z.V.D.I.*, 11/7/42), p. 77.

GLIDERS AND GLIDING

The New German Glider School at Ith (*Luftwelt*, 1/8/42), p. 226.

Sailing Flight and Aeronautical Research (Georgii, *Luftwissen*, Feb., 1944), p. 600.

HEAT TRANSMISSION, *see* also Engines—Turbines

The Basis of Compact Heat Exchanger Design (Walger, *Z.V.D.I.*, Vol. 88, Nos. 7-8, 19/2/44), p. 382.

Heat Transfer and Hydraulic Flow Resistance for Streams of High Velocity (Lelchuk, *J. of Tech. Physics, U.S.S.R.*; R.T.P. Trans. T.M.1054), p. 149.

Heat Transfer and Pressure Loss in Laminar and Turbulent Flow through a Slot (Altenkrich, *Z.V.D.I.*, Vol. 88, Nos. 7-8, 19/2/44), p. 382.

On Heat Transfer to a Flat Plate by Convection in Turbulent Flow, taking into account Combustion Effects (Rocard and Veron, *Comp. Rend.*, Vol. 215, No. 18, 3/11/42), p. 667.

Heat Transfer to a Plate in Flow at High Speed (Eckert and Drewitz, *Forschung*, June, 1940; R.T.P. Trans. T.M.1045), p. 151.

HYDROGEN, *see* Balloons

HYDRAULICS

Fault Detector for Hydraulic Systems (*Flugsport*, 19/1/44), p. 156.

INSTRUMENTS, *see* also Hydraulics

Contact Extensometer for Measuring Working Stresses (Thurn and Svenson, *Z.V.D.I.*, Vol. 88, Nos. 11-12, 18/3/44), p. 605.

An Instrument for Measuring the Wall Thickness of Long Tubes (*Deutsche Sportflieger*, Oct., 1943), p. 6.

INSTRUMENTS—ACCELEROMETERS

Measurements of Acceleration by Differentiating the Velocity (Gorner, *L.F.F.*, 10/1/39), p. 469.

INSTRUMENTS—TESTING

A.B.A. Rotor Balancer for Gyroscope and Supercharger Impellers (*Inter. Avia.*, Nos. 884-885, 14/9/43), p. 8.

JET PROPULSION

"Direpeller" Method of Jet Propulsion (Lagelbauer, *Mech. Engineering*, Jan., 1944), p. 157.

Some Notes on the Theory of the Campini System of Jet Propulsion (Varshovsky, *J. Tech. Physics., U.S.S.R.*, Vol. 11, No. 12, 1941), p. 310.

MAGNETISM, *see* Electricity and Magnetism

MATERIALS

The Centrifugal Casting of Gear Wheels (*Z.V.D.I.*, Vol. 88, Nos. 7-8, 19/2/44), p. 384.

Quartz Crystals (Types, Modes of Vibration and Methods of Manufacture) (Druesne, *Communications*, Vol. 23, No. 9, Sept., 1943, U.S.A.), p. 602.

MATERIALS—ALUMINIUM, *see* also Materials—Testing; Materials—Light Alloys

Aluminium Alloy Forging Dies (Duff, *S.A.E. Journal*, Nov., 1943), p. 4.

Set Backs in the War-time Expansion of the Light Metal Industry (*Inter. Avia.*, Nos. 913-14, 4/4/44), p. 384.

MATERIALS—CORROSION

Phosphatising in the Cold (*Z.V.D.I.*, Vol. 87, Nos. 49-50, 11/12/43), p. 223.

MATERIALS—DOPES AND FABRICS, *see* Balloons

MATERIALS—LIGHT ALLOYS

Heat Resisting Alloys for High Temperature Stressing (Evans, *Iron Age*, Vol. 153, No. 22, 1/6/44), p. 675.

Set Backs in the War-time Expansion of the Light Metal Industry (*Inter. Avia.*, Nos. 913-14, 4/4/44), p. 384.

Surface-Structure Markings on Al.-Mn. and Al.-Mg. Si. Sheet Metal after Anodic Treatment (Rohrig and Kopernick, *Z.f. Metallkunde*, May, 1943), p. 222.

MATERIALS — MAGNESIUM, *see* also Materials—Testing

Set Backs in the War-time Expansion of the Light Metal Industry (*Inter. Avia.*, Nos. 913-14, 4/4/44), p. 385.

MATERIALS—NICKEL

The Influence of High Frequency (Supersonic) Longitudinal Vibrations on the Magnetic Response of Nickel (Part III—Measurements on Nickel Wire with the Ferrograph) (Schmid and Jetter, *Z.f. Elektrochemie*, Vol. 48, No. 10, Oct., 1942), p. 223.

MATERIALS — NON-FERROUS, *see* also Materials—Testing

MATERIALS—PLASTICS, *see* also Materials—Testing

The Technique of Lining Tanks made of Wood, Metal or Concrete with Vinidur Plastic (Sirot, *Kunststoffe*, Feb., 1943), p. 158.

Transporting War Materials—Packaging Problems (*Chem. and Engineering News*, 25/10/43, U.S.A.), p. 7.

MATERIALS—RUBBER, *see* Balloons

MATERIALS—SPRINGS

Permissible Stress Range for small Helical Springs (Zimmerli, Univ. of Michigan, *Res. Bull.*, No. 26, 1934), p. 676.

Space Limitations and Optimum Conditions in Aircraft Spring Design (Carter, *J. Aeron. Sci.*, Feb., 1943), p. 74.

MATERIALS—STEEL, *see* also Materials—Springs; Materials—Testing; Materials—Welding; Vibration

The Influence of Carbon Content on the Hot Zincing of Sheet Steel (Pungel, *Stahl und Eisen*, 17/2/44), p. 226.

Special Addition Agent Steels (Schenk, *S.A.E. Journal*, Nov., 1943; Transactions, pp. 385-393), p. 2.

MATERIALS—STRENGTH

The Phenomenon of Rupture in Solids (Weibull, *Ing. Vet. Akad. Proceedings*, No. 153, 1939, Sweden), p. 383.

A Statistical Theory of the Strength of Materials (Weibull, *Ing. Vet. Akad. Proceedings*, No. 151, 1939, Sweden), p. 382.

MATERIALS—TESTING, *see* also Materials—Wood

The Effect of Annealing Temperature and Period on the Softening of Previously Cold Worked Metal (Crystal Recuperation and Recrystallisation Phenomena) (Pomp and Niebch, *Z.f. Metallkunde*, May, 1943), p. 222.

An Electronic Defectoscope (Gozelik, *Met. Ind. Review, U.S.S.R.*, July, 1939), p. 5.

A New Approximate Method for Measuring the Percentage Elongation of Metals at Fracture (Mikheilov, *Metal Industries, U.S.S.R.*, July, 1939), p. 6.

Non-Destructive Testing of Non-Ferrous Semi-Finished Metal Products by New Magnetic Induction Methods (Schirp, *E.T.Z.*, Vol. 64, Nos. 31-32, 12/8/43), p. 221.

Rapid Determination of the Magnesium Content of Al.-Mg. Alloys (*Z.V.D.I.*, Vol. 86, Nos. 35-36, 5/9/42), p. 160.

Testing of Plastic Sheets with Infra Red Rays (Steuber, *Schiff und Werft*, March, 1944), p. 463.

Tool Life Tests (Boston, A.S.M.E. Annual Meeting, Nov.-Dec., 1943, Preprint), p. 76.

Torsion Fatigue Testing Machine for Large Parts (*Z.V.D.I.*, Vol. 88, Nos. 3-4, 22/1/44), p. 227.

MATERIALS—THEORY OF STRUCTURES, *see* also Materials—Riveting

Shrink Fit Stresses and Deformation (Rankin, A.S.M.E. Annual Meeting, Dec., 1943, Preprint), p. 228.

Stress Peaks in Perforated Metal Plates and Strips (Hutter, *Z.A.M.M.*, Dec., 1942), p. 75.

The Stressing of Thin Circular Plates undergoing large Deflections under a Uniform Load (Federhofer, *L.F.F.*, 28/2/44), p. 603.

Stress Coefficients for Rotating Disks of Conical Profile (Bishopp, A.S.M.E., Dec. 1943 Meeting, Preprint), p. 227.

MATERIALS—WELDING

Flash Butt Welding for Tool Tips (A.E.G., *Z.V.D.I.*, Vol. 88, Nos. 7-8, 19/2/44), p. 384.

Production Applications of Flash Welding (Milmoe, S.A.E. National Meeting, Jan., 1943, Preprint), p. 463.

The Quality of Resistance Flash Welds of High Tensile Steels (Bollenrath and Cornelius, *L.F.F.*, 28/2/44), p. 606.

Substitution of Phosphoric and Chromic Acid for Hydrofluoric Acid for Cleaning Sheet Metal to be Spot Welded (*Flying and Industrial Aviation*, Jan., 1943), p. 159.

MATERIALS—WOOD

Plywood Characteristics disclosed by Vibration Tests (Yorgiadis and Robertson, *Aero Digest*, April, 1944), p. 468.

MEDICAL

The Effect of Oxygen Deficiency on the Human Organism during Short Time Exposure to High Altitude Conditions (Tavel, *Helvetica Physiologica, etc.*, Suppl. I, 1943), p. 387.

METEOROLOGY, *see* also Electricity and Magnetism

Dangers of the Atmosphere (Translation of Abstract) (Eriksson, *Flygning*, Vol. 20, No. 15; translated in *Flugwissen*, April, 1943), p. 225.

New Calculation of Specific Heat, Enthalpy and Entropy of Air (Justi, *Ann. d. Physik*, Vol. 29 (1937), pp. 302-305), p. 595.

The Theory of the Formation of Stationary Atmospheric Waves in the Lee of an Obstacle Exposed to a Horizontal Wind, with Meteorological Applications (Lyre, *Z.A.M.M.*, Feb., 1943), p. 592.

OXYGEN, *see* Medical

PHOTOGRAPHY, *see* Airscrews — Testing; Chemistry

PHOTOGRAPHY—CAMERAS

Determination of the Loss of Definition due to steady or irregular Motion of an Aerial Camera by the Pictorial Point Method (Nagel, *Allg. Verm. Nachr.*, Vol. 51, No. 26, 15/9/39), p. 392.

PROPELLERS, *see* Airscrews

REFERENCES TO TECHNICAL PRESS

pp. 15, 87, 163, 237, 319, 395, 474, 540, 612, 685.

RESEARCH, *see* also Wind Tunnels

Research for Aeronautics: Its Planning and Application (Farren, *Engineer*, Vol. 157, Nos. 4598-99, 25/2/44, 3/3/44), p. 232.

ROTORCRAFT—HELICOPTERS

The Bell Helicopter (Macauley, *Aero Digest*, 15/4/44), p. 669.

STRATOSPHERE, *see* also Engines—Lubrication; Medical

TRANSLATIONS

List of Selected Translations, pp. 13, 85, 161, 235, 317, 393, 472, 610, 681.

VIBRATION, *see* also Materials—Wood

The Damping Capacity of Engineering Materials (W. H. Hatfield and others, *Trans. N.E. Coast Inst. of Eng. and Shipbuilders*, Vol. 58, 1941-42, pp. 273-332), p. 601.

Experimental Investigation in Aircraft Dynamics (Berger, *J. Aeron. Sci.*, Oct., 1943), p. 154.

Vibration Table for Dynamic Tests in the Sonic Frequency Range (Meister, *A.Z.*, March, 1942), p. 310.
